

Balloutt Callouts – How to Follow My Alerts

Emoji legend:

- 🟡 Entry – trade is live, this is my entry.
- 🟢 TP hit – one of the take-profit levels has been reached.
- 🔴 SL hit – stop-loss has been hit, trade closed.

Terms used in alerts:

SL: Where I close the losing trade (stop-loss).

TP 1: First level to take partial profits.

TP 2: Second level to take partial profits.

TP 3: Level to trim the profits you'd like to take home.

FULL EXIT: Level where I personally close the entire position.

-/-

Example alert message you will see in Discord:

🟡 TSLA 400C ODTE

Entry: 1.20

SL: -25%

TP 1: +35% – take 25–30% off if you want.

TP 2: +75% – take more profits, usually 50%+ off.

TP 3: +95% – trim the rest if you want to lock in gains.

FULL EXIT: +140% – I'm fully out here (no position).

Thesis will be sent in a follow-up message.

I always hold runners, all TP levels above are merely suggestions. Manage your own risk and choose your own partials. 0DTE options expire the same day and are high risk, so size appropriately and never risk money you cannot afford to lose.

Risk & expectations:

These alerts show how I personally trade and are for educational purposes only. This is not financial or investment advice. Make your own independent decisions, manage your own risk, and size based on your account and experience. 0DTE options are highly volatile and can go to zero quickly.
